

The roots of the organization lay in Kolkata and Chennai, but our branches are spread pan-India and abroad. Students from different places actively engage in DFC's online events and on-ground activities. We have conducted health camps and public health education skits for the population as well as educative master classes, competitions and webinars for students. Under the umbrella of DFC, we have eight task forces- Animal Welfare, Women's Health and Safety, support for the Differently Abled,

Sexual and Reproductive Health, Mental Health, Academics and

Education, support for LGBTQ+ and Public Health. In the past few years, we have organized medical quizzes, game shows, a virtual pride parade, taught Indian Sign Language and engaged with people far and wide to raise empathy and awareness. In the coming years, we hope to grow our family with post graduate residents and non-medical students and together, continue to choose humanity.
